- Data Structures and Algorithm
- Design and Analysis of Algorithms
- DBMS
- Operating Systems

SKILLS

PROGRAMMING

Over 3000 lines:

- PHP • Java

Over 1000 lines:

- C++ • JavaScript • HTML • CSS • Bootstrap

Familiar:

- Python • .NET

CLOUD

- AWS Cloud services
- Microsoft Azure

ACHIVEMENTS

- AWS Cloud Practitioner Certified

EXPERIENCE

NAVPAD INFOTECH | WEB DEVELOPMENT INTERN

May 2022 – Jun 2022 | Vadodara, India

- Designed and developed the user authentication and registration modules using the ASP.NET framework.
- Implemented secure login functionality to protect user accounts from unauthorized access.
- Integrated Google sign-in feature to provide users with a convenient and trusted authentication option.
- Developed a password reset mechanism that allowed users to reset their passwords securely through email verification.
- Implemented captcha verification during signup to prevent automated bot registrations and enhance system security.

GROUP PROJECTS

AMBICA ELECTRONICS

Aug 2022 – Oct 2022 | Vadodara, India

- Developed and maintained the Ambica Electronics e-commerce website using PHP and MySQL.
- Designed and developed product detail pages, including images, descriptions, and customer reviews.
- Implemented a contact form for customers to contact the showroom for product-related inquiries and services.
- Integrated the Razorpay payment gateway, enabling customers to make payments online or opt for cash on delivery.
- Developed a feature for customers to download their bills from the website.
- Implemented an admin panel to add/edit products, view order information, and manage stock levels.

VEGMART

Dec 2021 – Feb 2022

- Developed and maintained the VegMart website using Django and SQL Lite.
- Implemented features for users to buy fresh fruits and vegetables from available shops.
- Designed a registration system for shopkeepers to sell fruits and vegetables at their desired prices.
- Created a job application process for delivery boys, which involved verification by the admin.
- Developed a delivery tracking system for delivery boys to view their assigned deliveries.
- Implemented a cart option for customers to store selected items and download invoices.
- Integrated a feature to track orders and access delivery boy contact information.
